

AQUAKNOX

Aquaknox Norris Lake

We exclusively service Mercury, MerCruiser, Yamaha Outboards, Malibu Monsoon, Indmar engines in Malibu or Axis boats 15 years old or newer. This focused approach means faster diagnostics, better service, and reliable results from a team that truly knows your boat inside and out. Aquaknox offers a Dockside Care Program included with every new boat purchase. We have curated a list of local marine service providers we recommend for other services.

Aquaknox West Knoxville

As a new operation, Aquaknox West Knoxville is offering a focused service lineup to ensure we deliver outstanding customer service. We currently offer service for Malibu, Axis, Chaparral, and Harris boats that are 15 Years old or newer and offer Mercury and MerCruiser product support exclusively for tenants of Fox Road Marina. As we grow into our new facility, check back for updates on additional brands and products we may service. Boats purchased from either Aquaknox location will continue to receive service support at either store based on the commitments made at the time of purchase.

Mobile Service

At Aquaknox Marine, all mobile service is provided through our Dockside Care Program, which is included with the purchase of a new boat through Aquaknox Marine. In support of the Malibu and Axis owner community, Aquaknox Marine may extend Dockside Care to customers who purchased their boat prior to Aquaknox becoming the Knoxville-area Malibu and Axis dealer, subject to the following stipulations.

To enroll in the Dockside Care Program, a completed enrollment form is required. This form provides essential information needed to service your boat. Upon submission, the form will be reviewed by our management team, and approval will be issued accordingly.

For these customers, the dockside care rate will be **\$199.00** per trip for boats located within 30 minutes of either of our locations. For boats located more than 30 minutes away, the rate will be calculated at **\$199.00** per hour, based on round-trip travel time in average traffic conditions. Our mobile service is designed for routine maintenance and light repairs that can be easily managed in the field. For major repairs or in-depth troubleshooting, service must be performed at our dealership facilities.

To maintain eligibility for this dockside care offering beyond December 31, 2026, boaters must have Aquaknox complete at least one annual service between September 1, 2025, and December 31, 2026.

Aquaknox will always provide winterization dockside with no trip charge. If you have not scheduled by October 15, 2026 a trip charge may be added.
